

PAYBITOPRO COPY TRADING

Copy Trading

Copy trading is a popular investment strategy that allows you to replicate the trades of experienced traders automatically. This user manual will guide you through the process of copy trading, explaining the key concepts and steps involved.

Copy trading is a method of mirroring the trades of skilled traders in real-time. By copying their trades, you can benefit from their expertise and achieve similar investment outcomes. Copy trading eliminates the need for in-depth market analysis and allows beginners to participate in the financial markets.

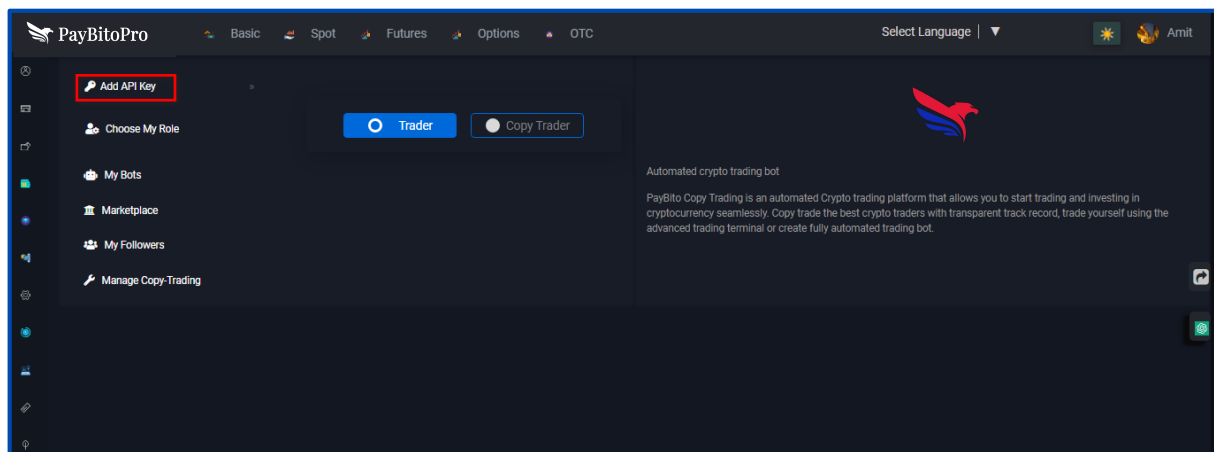

Please follow the instructions below to get started.

Process flow as a Trader

Add API Key:

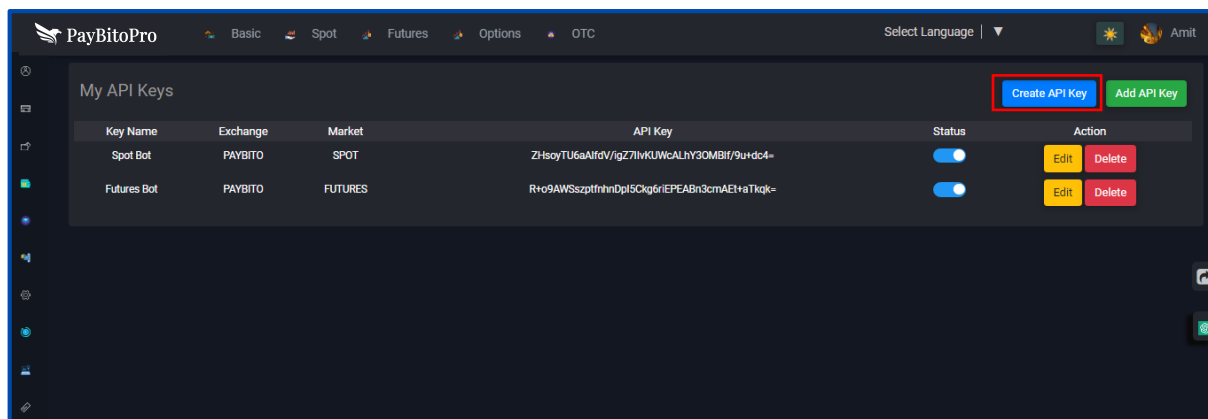

Login to your PayBitoPro account and go to <https://trade.paybito.com/copy-trading> link.

MarketPlace:

A marketplace is an online platform that connects traders and investors. It allows traders to showcase their strategies and performance records, while investors can browse and select traders to copy. The marketplace provides tools and features for investors to evaluate traders' performance and risk levels. Once chosen, investors can allocate funds to automatically replicate the trades of the selected trader.

Trader API keys and Bots displaying here. Users can search Traders API key and Traders bots by Exchange, Time, Market Type, Trade Quantity etc.

There are two sections view Traders and My API sections

View Traders:

In the view Traders sections displayed trader name, followers, Market, Minimum Capital Requirement.

Trader Name

Amit Test

Followers 0

Market FUTURES

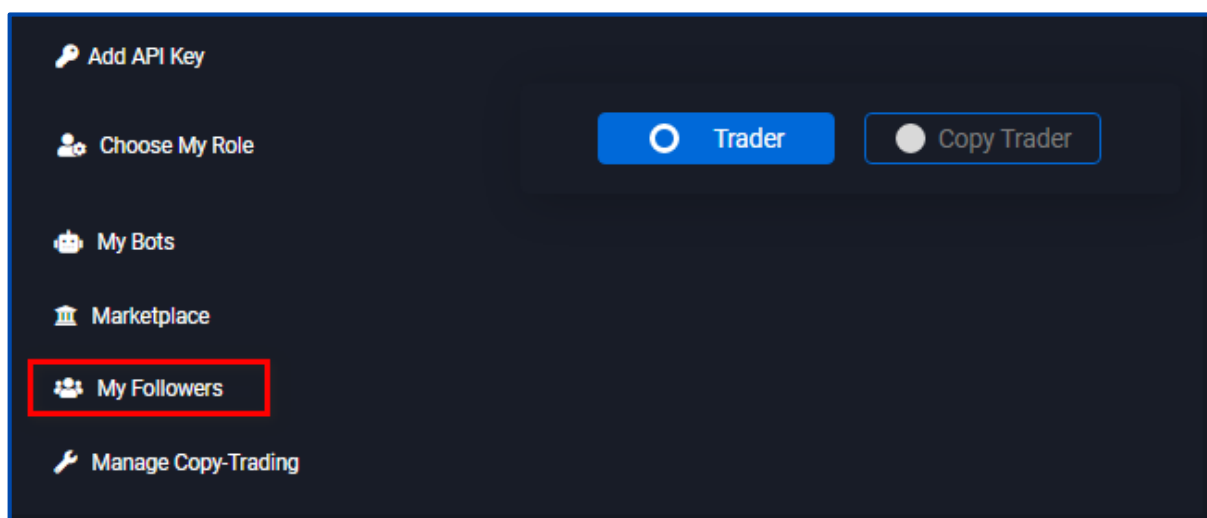

Minimum Capital Requirement USDT 200

| | All Time | Month | Week |
|------------------|----------|-------|------|
| P/L | 0 | 0 | 0 |
| Volume | 0 | 0 | 0 |
| Number Of Trades | 0 | 0 | 0 |

My Followers:

My Followers displays the number of investors who have chosen to copy a particular trader. The "My Followers" section typically provides information such as the number of followers, their usernames, and possibly additional details about their investment amounts or performance.

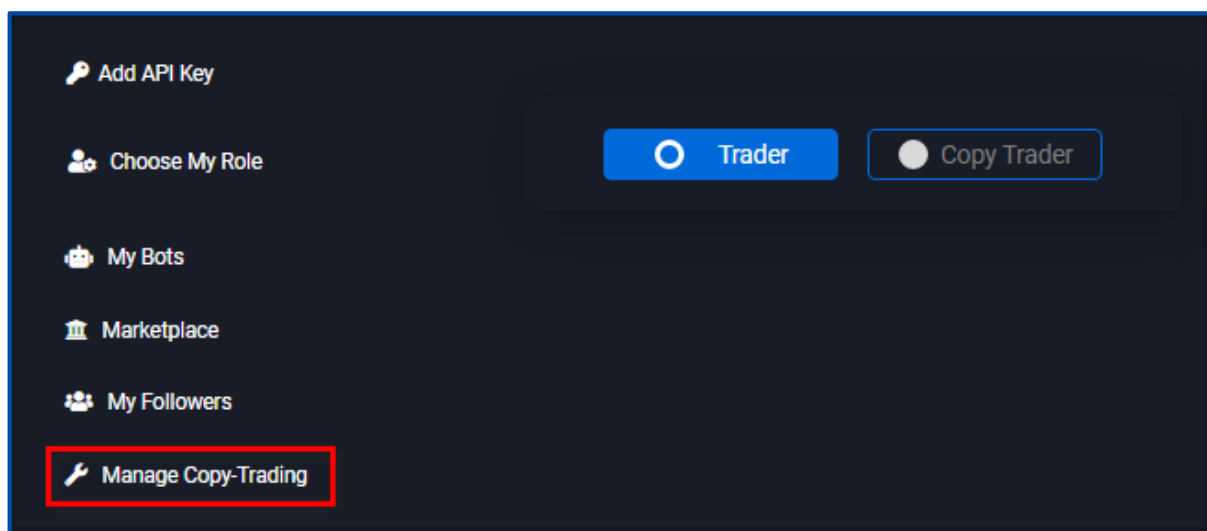

Here display the My Followers and My Bot Followers numbers.

| Followers | |
|------------------|---|
| My Followers | 0 |
| My Bot Followers | 2 |

Manage Copy-Trading:

This refers to the functionality and tools available to traders for monitoring and controlling the copy-trading activities in their accounts. Traders can access a range of features that allow them to manage their copied trades, such as adjusting trade sizes, setting risk parameters, and modifying the allocation of funds to different trades. Managing copy-trading provides traders with the flexibility and control to optimize their copy-trading activities and enhance their overall trading performance.

There are two sections Payments Received and Manage Copy-Trading

Payments Received:

Traders can see the subscription payments that have received as a Trader from copy traders who followed you or your bots.

A screenshot of the 'Payments Received from followers' section in the PayBitoPro dashboard. The section title is 'Payments Received from followers'. Below the title, there is a subtitle: 'You can see the subscription payments you have received as a Trader from copy traders who followed you or your bots'. Underneath, there is a section titled 'Payments I have received'. This section contains a table with two columns: 'Date' and 'Amount in USDT'. The table has two rows of data.

| Date | Amount in USDT |
|----------------------------|----------------|
| 2023-05-17 14:51:21.305577 | 10 |
| 2023-05-17 07:37:09.11462 | 10 |

Manage Copy-Trading:

Here traders can publish API Keys and trading bots, and trade can Show and hide Marketplace and Copy Traders.
