

ICO LAUNCHPAD USER GUIDE

CONTRACT OWNER

ICO stands for Initial Coin Offering. It's a fundraising method used by startups and projects in the cryptocurrency and blockchain space to raise capital. In an ICO, a company or project issues digital tokens or coins and sells them to investors in exchange for established cryptocurrencies like Bitcoin or Ethereum.

Project Concept: A company or project has an idea for a new cryptocurrency, a blockchain platform, a decentralized application (dApp), or another project that they want to develop.

Token Creation: The company creates digital tokens or coins on a blockchain platform, usually based on standards such as Ethereum's ERC-20 or Binance Smart Chain's BEP-20.

Whitepaper: The company publishes a whitepaper outlining details of the project, including its purpose, goals, technology, team, tokenomics (distribution and use of tokens), and the ICO process.

Token Sale: The company launches the ICO, offering the newly created tokens for sale to investors. Investors can participate in the ICO by sending cryptocurrencies (or sometimes fiat currency) to the project's wallet address during a specified period.

Token Distribution: After the ICO ends, the company distributes the purchased tokens to investors based on the amount of cryptocurrency they contributed.

Post-ICO: Once the ICO is completed, investors can hold onto their tokens as an investment, trade them on cryptocurrency exchanges, or use them within the project's ecosystem, depending on the utility of the tokens.

Go to <https://ico-contract-owner.hashcashconsultants.com/sign-in.html> link.

Click on Register Now! Link.

1. Enter Organization name
2. Enter the First name
3. Enter the Last name
4. Enter the email address which is not already registered
