NFT MARKETPLACE USER GUIDE

PayBitoPro Marketplace:

Open the below URL for this https://www.paybito.com/nft-marketplace/

An NFT marketplace with login and "My Cart" option offers users a personalized and streamlined experience for buying, selling, and managing non-fungible tokens (NFTs). With a login feature, users can create accounts, allowing for secure access to the platform's features and their own profile. Through login credentials, users can track their transactions, manage their collections, and engage in various platform activities seamlessly.

The "My Cart" option enhances user convenience by providing a centralized location to monitor selected NFTs for purchase. Users can add desired NFTs to their cart while browsing the marketplace, enabling them to review, edit, or proceed with the checkout process at their convenience. This feature simplifies the purchasing journey, reducing the need to revisit individual NFT listings and ensuring a smoother transaction flow.

Overall, the integration of login functionality and the "My Cart" option in an NFT marketplace enhances user engagement, facilitates personalized interactions, and optimizes the buying experience. By offering these features, the platform empowers users to explore, acquire, and manage NFTs with greater efficiency and confidence.

Collections: All collection lists are displayed here.

Create Collection:

When creating a collection, users are prompted to fill in mandatory fields:

- Logo Image: Representing the collection visually.
- Banner Image: Displayed prominently as the collection header.
- Name: Identifying the collection.
- Symbol: Symbolizing the collection's unique identifier.
- Description: Offering insight into the collection's theme or purpose.
- Category: Categorizing the collection for easy searchability.
- NFT Network Dropdown: Selecting the blockchain network for NFT deployment.

Non-mandatory fields include social media links for Twitter, Facebook, Instagram, Discord, and Telegram,

enabling users to enhance visibility and community engagement for their collections.

Fill in all the mandatory fields, then click the 'Save' button to create the collection.

My NFTS:

In "My NFT," all minted NFTs are showcased, providing users with a comprehensive overview of their digital assets and enabling easy management and tracking of their minted creations.

Favorites:

In "Favorite," all favourited NFTs are conveniently displayed, allowing users to easily access and enjoy their preferred digital assets within their collection.

Create NFT:

Users can create NFTs seamlessly with the "Create a Collection" and "Mint an NFT" options. "Create a Collection" empowers users to curate a unique collection, defining its logo, banner, name, symbol, and more. "Mint an NFT" enables users to mint individual digital assets within their collections, ensuring smooth creation and deployment on their chosen blockchain network.

Create collection is already discussed above.

Mint an NFT:

Minting an NFT involves several steps:

- Upload Image: Select the digital asset to be minted.
- Collection: Choose the collection to which the NFT belongs.
- Name: Provide a title for the NFT.
- Description: Add details or context about the NFT.
- External Link: Optionally link to external content related to the NFT.

www.paybito.com

- Creator Earning (%): Determine the percentage of earnings allocated to the creator upon each sale.
- Floor Price: Set the minimum price for initial sale.
- NFT Network: Select the blockchain network for minting.
- Traits: Define unique attributes or characteristics of the NFT, enhancing its value and appeal.

Fill in all the mandatory fields, then click the 'Save' button to mint an NFT.

Non Minted NFT:

"Non-Minted NFTs" refers to digital assets that have not yet been tokenized or officially created on a blockchain network. These assets exist in digital form but have not undergone the process of becoming unique, verifiable tokens. Users can manage and organize these potential NFTs, preparing them for minting and deployment on their chosen blockchain network at a later time.
